

Metalworking OSYRIS 2626 TP

TOTAL

Solvent cut back type long term protection RP oil.

PRODUCT PROFILE

- Osyris 2626 TP is a unique blend of refined hydrocarbon, synthetic dialkyl ester and film forming dewatering additives. These additives wet the metal surface and displace the moisture while hydrocarbon present evaporates to form a thin soft greasy film to compact the effect of corrosion. Exhibit good salt spray and humidity resistance character

APPLICATIONS

- For the protection of precious engineering, auto components as well as steel strip & tubes from corrosion.
- Best suitable for maritime protection.

ADVANTAGES

- **Reduces rejection and cost of poor quality** due to its excellent rust prevention character
- Balanced hydrocarbon base helps in reducing evaporation loss thus avoid **thickening of fluid and excessive consumption.**
- Built-in adjuvant helps in quicker displacement of water and settling of sludge thus **improves aesthetics and productivity.**
- Lower surface tension nature helps in **increased spread ability, shorten draining time and wastage.** Brings down consumption of oil/component
- **Versatile in humid atmosphere** due to its non-emulsifying nature.

Typical Characteristics	Reference Methods	OSYRIS 2626 TP
Density at 29.5°C	ASTM D 1298	0.812
Flash point PMCC, °C	ASTM D 93	40
Water Displacement	IS 1154	Passes
Film thickness (microns)	IS 2079	4- 5
Finger print test	Internal	Passes
Protection – Indoor	Internal	6- 9 month
Outdoor		2 months

Above characteristics are mean values given as an information.
